EDUCATION

PES UNIVERSITY

Bachelor of Technology in Computer Science

Bengaluru, Karnataka

2023 – Present

Sri Sathya Sai Loka Seva PU College

PCMB

Alike, Karnataka

2021 – 2023

TECHNICAL SKILLS

Programming Languages: Java, Python, C, JavaScript

Frameworks: React, Node.js, Spring Boot, Express.js

Databases: MySQL, MongoDB, NEO4J

Library: NumPy, panda, Scikit-learn, Streamlit

Tools: GitHub, Docker, Jira, flask, figma, Postman

Concepts: Data Structures & Algorithms, OOP, DBMS, CN, OS , LLD

PROJECTS

UrbanVault : E-Commerce Web Application | *React, Node.js, MongoDB*

- Developed a full-stack e-commerce platform with Firebase authentication, product management, cart, wishlist, checkout, order tracking, and admin functionality.
- Implemented RESTful APIs for managing users, products, orders, even delivery and seller co-ordination in one platform.
- Designed responsive UI components using React and CSS.

Customer Relationship Management (CRM) Web App | *React, Node.js, Express, MongoDB*

- Developed a full-stack Customer Relationship Management web application for streamlined customer data handling.
- Built both frontend and backend modules using React for UI and Node.js with Express for RESTful APIs.
- Integrated MongoDB for persistent storage and implemented CRUD operations for customer records.
- Collaborated with development team using Git and GitHub for version control, feature development, and code integration.

Coral Regime Predictor | *Python, Scikit-learn, Jupyter Notebook*

- Developed a machine learning classifier to predict coral reef bleaching severity (Low/Medium/High) using environmental and site-specific features.
- Compared Logistic Regression, SVM, and Random Forest models using accuracy, precision, recall, and F1-score.
- Applied data preprocessing, feature scaling, class balancing, and hyperparameter tuning to improve model performance.

TradeNest : Peer-to-Peer Online Marketplace Platform | *Java, Spring Boot, React, MongoDB, REST APIs*

- Developed a full-stack peer-to-peer marketplace enabling users to create, browse, search, and manage product listings through RESTful APIs.
- Implemented Auction based product trading using RazorPay payment gateway and implemented authorized trading process.
- Implemented a layered Spring Boot backend with authentication, CRUD operations, listing management, and MongoDB persistence, integrated with a React frontend.

RELEVANT COURSEWORK

Data Structures and Algorithms, Web Development, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Machine Learning

ACHIEVEMENTS & ACTIVITIES

Participated in college-level hackathons and coding contests.

Actively solving Data Structures and Algorithms problems in Leetcode, Geek for Geeks and TUF.
