PROFESSIONAL SUMMARY

Computer Science undergraduate with strong foundations in data structures, algorithms, and software development. Hands-on experience building academic and personal projects using modern technologies. Seeking entry-level opportunities to apply problem-solving and development skills in real-world applications.

EDUCATION

PES UNIVERSITY

Bachelor of Technology in Computer Science

Bengaluru, Karnataka

2023 – Present

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript

Frameworks: React, Node.js, SpringBoot, Express js

Databases: MySQL, MongoDB, NEO4J

Library: numpy, panda, sci kit-learn, streamlit

Tools: Git, GitHub, Docker, Jira, flask, figma

Concepts: Data Structures Algorithms, OOP, DBMS, CN, OS

PROJECTS

E-Commerce Web Application | *React, Node.js, MongoDB*

- Developed a full-stack e-commerce application with user authentication, product listing, and cart functionality.
- Implemented RESTful APIs for managing users, products, and orders.
- Designed responsive UI components using React and CSS.

Customer Relationship Management (CRM) Web App | *React, Node.js, Express, MongoDB*

- Developed a full-stack Customer Relationship Management web application for streamlined customer data handling.
- Built both frontend and backend modules using React for UI and Node.js with Express for RESTful APIs.
- Integrated MongoDB for persistent storage and implemented CRUD operations for customer records.
- Collaborated with a development team using Git and GitHub to manage features, workflow and CI/CD pipeline.

Coral Regime Predictor | *Python, Scikit-learn, Jupyter Notebook*

- Created a machine learning classifier to predict coral reef bleaching severity (Low/Medium/High) using environmental and site data.
- Worked with Logistic Regression, SVM, and Random Forest models to compare performance and select optimal prediction strategy.
- Performed data preprocessing, training, validation, and evaluation of ML models in Jupyter Notebooks.
- Improved classification accuracy by applying feature scaling and hyperparameter tuning.

TradeNest — Peer-to-Peer Online Marketplace Platform | *Java, Spring Boot, React, MongoDB, REST APIs*

- Developed a full-stack peer-to-peer marketplace platform enabling users to create, browse, search, and manage product listings through RESTful APIs.
- Built a layered Spring Boot backend with secure user authentication, listing management, and persistent data storage, integrated with a responsive React frontend.

RELEVANT COURSEWORK

Data Structures and Algorithms

Web Development

Database Management Systems

Operating Systems

Computer Networks

Machine Learning

ACHIEVEMENTS & ACTIVITIES

Participated in college-level hackathons and coding contests.
